USE THE DRAWING PROCESS!

## ASSESSMENT IN DRAWING

- 1. TIME - you need to spend at least 45 minutes on each task.**
- 2. PROPORTION & STRUCTURE – sketching first, make sure things are the right size.**
- 3. ATTENTION TO DETAIL - try to notice small things like stitching, texture, reflections etc.**
- 4. USE SHADING - to make the drawing more 3D and show the effect of light and shade.**

**TASK 1 - A drawing of a bunch of keys. You must draw them bigger than actual size.**

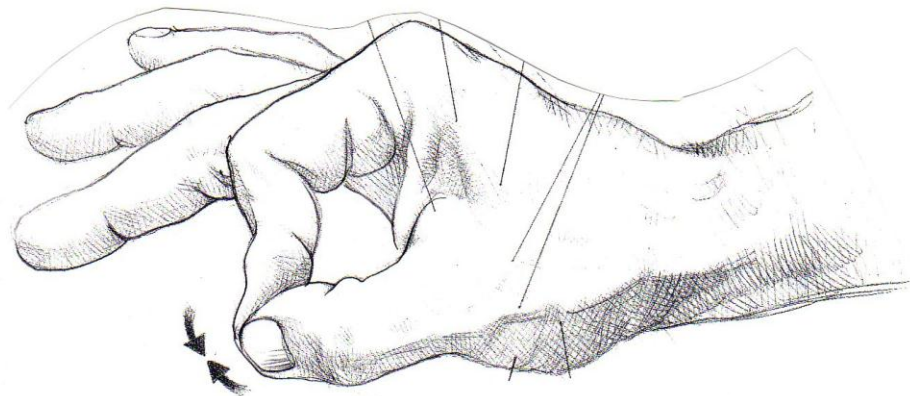

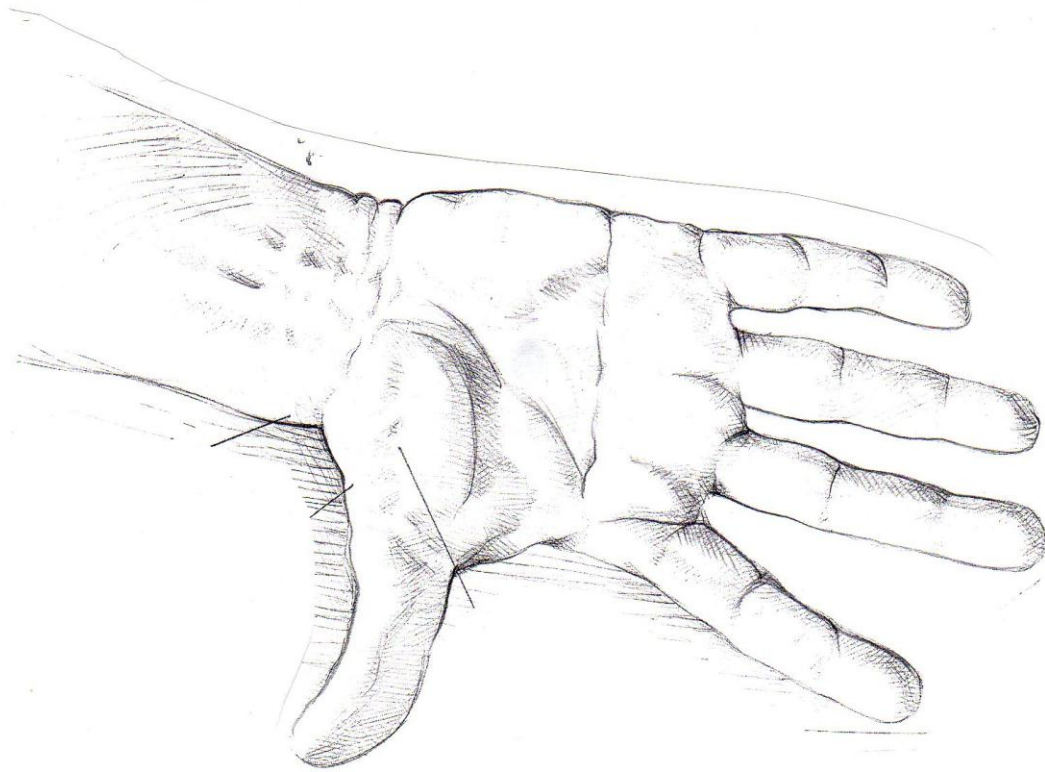

**HINTS - Look carefully at how each key is cut differently.**

**TASK 2 - Copy your favourite CD Cover. Look carefully at the styling of any lettering.**

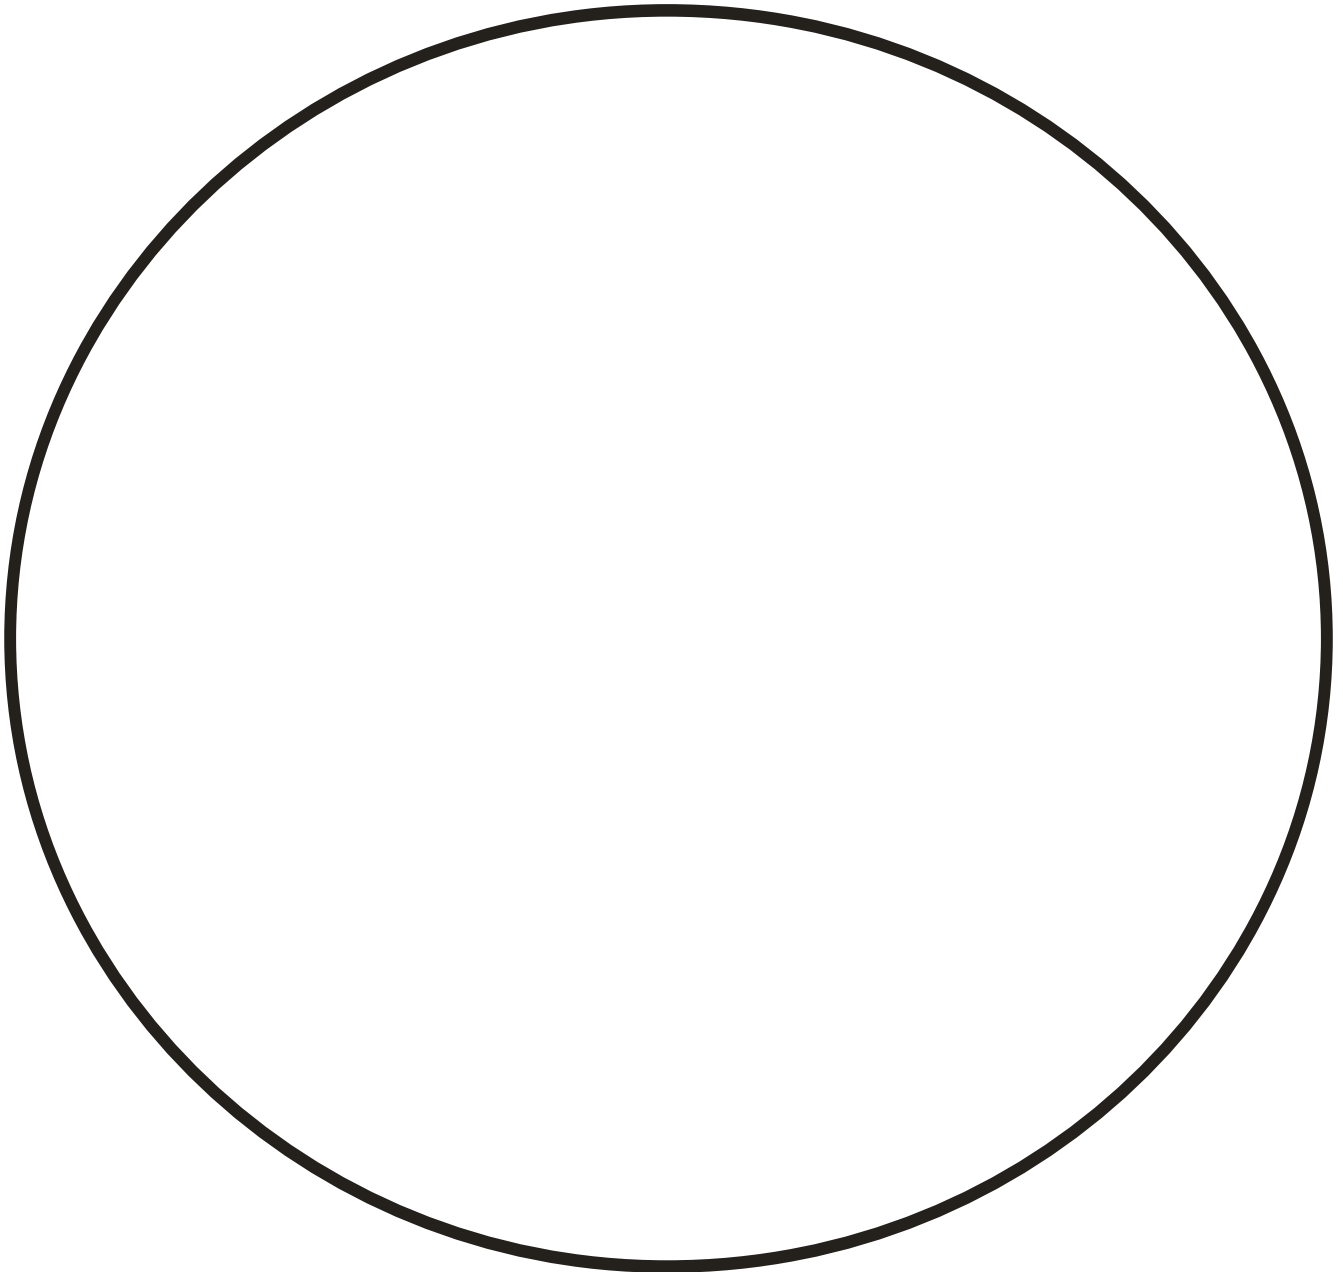

**HINTS - You can draw around the CD Box to get the exact size.**

**TASK 3 - A drawing of a hand in an interesting position.**

**HINTS - Look carefully at creases and folds in the skin. You could hold an interesting object.**

**TASK 4 - Creativity Challenge - 40 minutes**

**Use the circle above as a starting point for an image of your own choice. You must create something that takes at least 40 minutes. Use your imagination!**

**TASK 5 - A drawing of a cup or mug showing correct ellipses.**

**HINTS - An ellipse has no sharp corners. Draw any pattern on the cup and show how it looks as it disappears round the edge.**

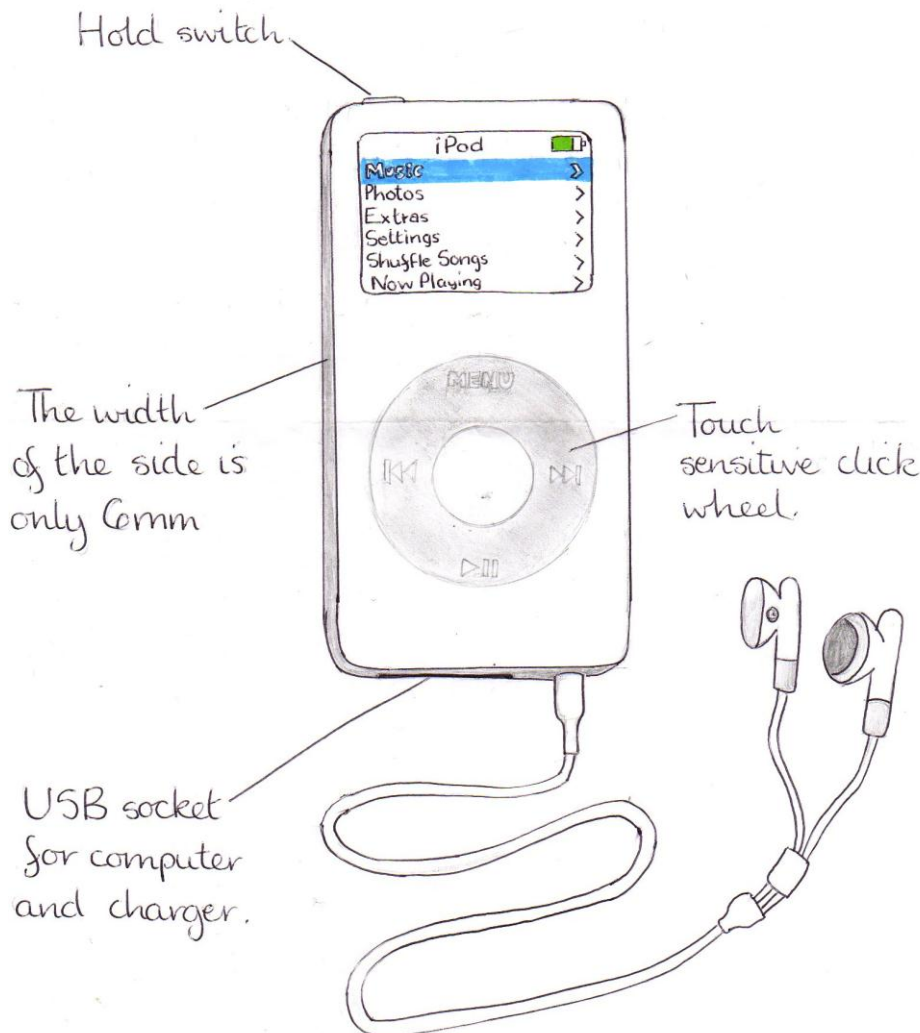

**TASK 6 - A drawing of a full length figure in correct proportion either from a drawing, photograph or real life.**

**HINTS - Avoid cartoon characters which often exaggerate proportion.**

**TASK 7 - 'Great Design Ideas'. Choose a product that you think should hold this title. Make a detailed drawing and write comments on clever design features.**

# Great Design Idea iPod Nano

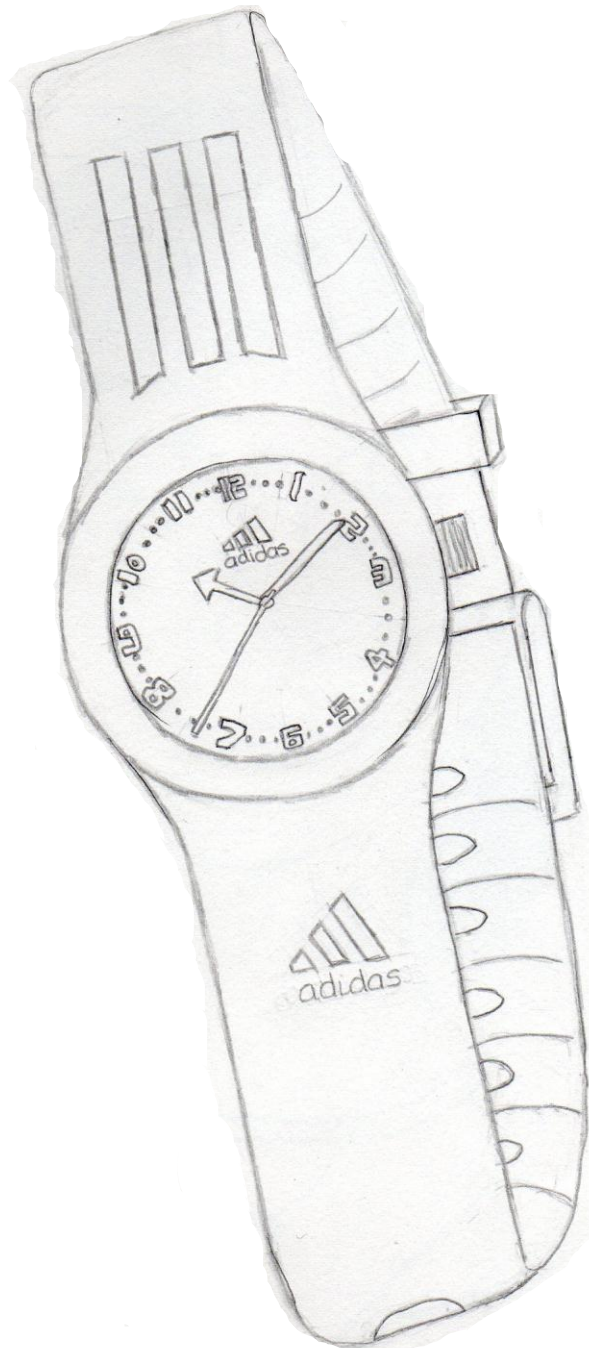

The actual size is 4cm x 9cm

**TASK 8 - Write a storyboard about a character making an amazing discovery.**

**HINTS - Your beginning and end boxes are important. Minimise dialogue. Look at cartoon strips for ideas.**

**TASK 9 - A drawing of a watch or a clock.**

**HINTS - If drawing a watch make it much bigger than actual size.**
